|---|--|
| Manufacturer: | |
| Model: | |
| Serial number: | |
| Description of failure, operating system, most important files: | |
| Additional equipment delivered with data carrier: | |

Express *

HDLab takes on data carrier failure analysis and to make an attempt of data recovery.

The analysis of the failure is free of charge.

HDLab takes on to convert data on consigned data carrier only in order to their coherence definition and assumes an obligation not to disclose consigned data to third parties.

HDLab is not responsible for physical failures and data incoherence.

Physically damaged disks analysis requires data carrier opening which is connected with a danger of disk manufacturer's warranty loss.

The data carrier not taken back within 2 months from the order placing date becomes HDLab property.

If the service is performed in an express course it mince it will be performed in twice faster time than usual.

The service time is measured from the time of delivering data carrier to HDLab's seat to the time of delivery recovered data to customer's seat.

In the case HDLab is not capable of performing the service in twice faster time then the payment for such service is like for the standard service.

HDLab is not responsible for the legality data and the software stored on the consigned data carrier.

I declare that I am owner of the data stored on the consigned data carrier or I have documents authorized to view the data.

I declare I am familiar with the regulations described above and I accept them.
